The stylish, sleek and ultra-portable CF-T4 comes complete with a touchscreen, and is so compact and convenient that you can take it anywhere with you. Its low weight of 1.51 kg and tight dimensions make it ideal for carrying in a handbag or briefcase.

Despite its low weight, the construction of the CF-T4's special magnesium casing makes it an extremely tough piece of equipment. It can withstand a force of 100kgf, providing highly effective protection for its bright and clear 12.1-inch anti-glare display; that and the convenient hand strap underneath the notebook makes one-hand operation easy. Data can be entered easily using a stylus pen. Apart from the display, the highly accessible, easy-maintenance hard drive is shock-resistant to ensure that your CF-T4 will easily withstand the daily rigors of travel, even protecting your data from a 30 cm drop.

Integrated Intel® Centrino® Mobile Technology allows wireless access to your data and information from the thousands of WLAN hotspots available across the world. Apart from that, the high-capacity lithium-ion battery and carefully selected components give you up to an amazing 12 hours battery power – ideal for a tough working day on the road.
