Constructed using tough, scratch resistant magnesium alloy casing, the CF-73 has a vibration dampened LCD panel and HDD that are able to withstand a 30cm drop. Its splash resistant keyboard and touchpad helps to stop water or any other liquid from entering the casing and interfering with the internal circuits, while rubber port covers protect all sensitive external connections.

The Lithium-ion battery of the CF-73 is capable of operating for up to 5 hours – enough to see you through a typical working day. Integrated WLAN opens up a whole new way of working on the move, allowing you to access data and information from thousands of hotspots worldwide. The versatile hot-swapping Multimedia Pocket enables a second battery pack or DVD-RAM multi drive to be installed – giving you complete flexibility, wherever your business takes you. In addition, the amazing built-in flat ceramic stereo speakers of the CF-73 provide presentation quality sound over a wide frequency range, while still maintaining its compact size.

The CF-73 can be configured with an integrated GSM/GPRS module for complete mobility, while the additional port replicator or I/O box provide you with versatile connectivity.
